

Phomo → Fomo → Fear of Missing Out

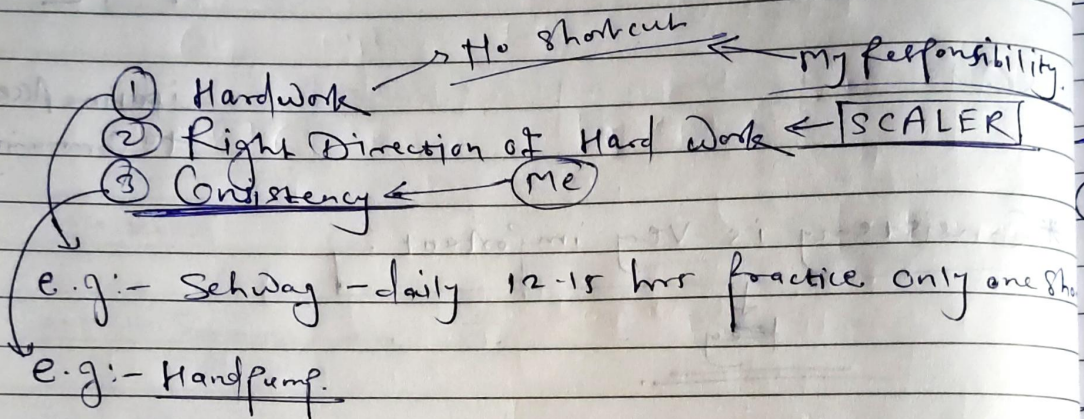

27/07/24

16 March 2022

## 2) Dare to Dream

### DARE TO DREAM

Instructor: Anshuman

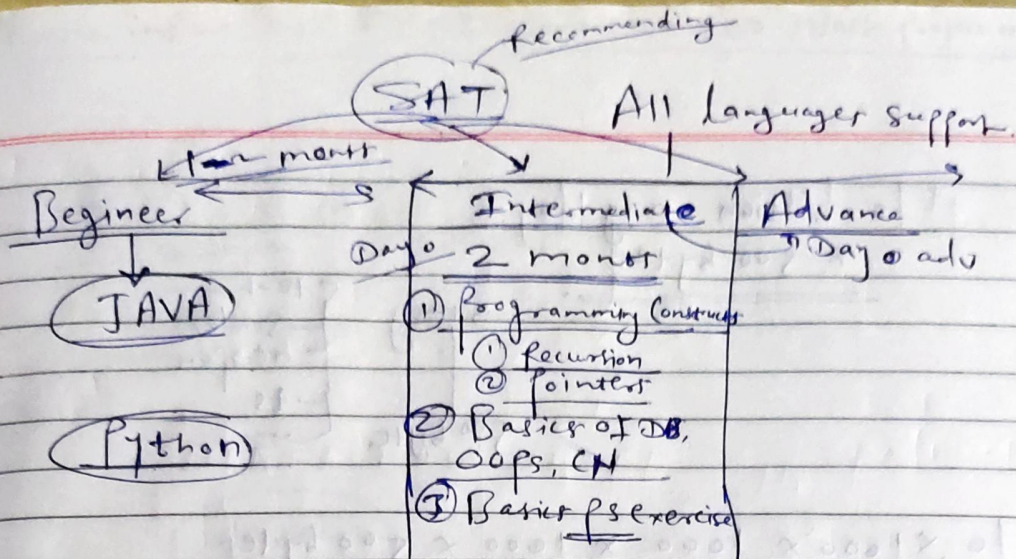

$$(1.01)^{365} = 37.1$$
$$1^{365} = 1.$$

Topics

\* Interview

Career

Advanced Topic	Interview	Careers
1) Problem Solving / DSA	→ Super important	1) Efficiency as a habit.
6-7 weeks	3-5 Month	2) Coding Accuracy & Productivity.
2) CS Fundamentals OS, DB, Computer Networks	2-3 weeks	3) I.I. Cases → Good vs Great.
	HI	Very Important.
DESIGN	0+	
1) Low Level design OOPS based design	→ Important for interview	2+
	Design patterns, SOLID principles, Case studies with feedback	Super important.
2) System Design High Level Design	→ 2+ years of Exp	→ SDE 2+
	6+ case studies	System Design
10 billion msg / day = 500 bytes	→ 10000000000	

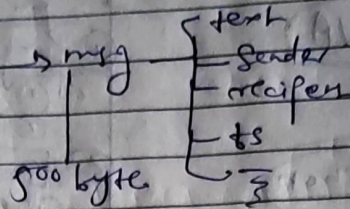

- In Frontend Interviews, DSA is also important.
- Coding Accuracy is Important.
- The 1<sup>st</sup> version of Fb is written in php.
- Company care about efficient Code.
- Increase the productivity.

Note → Just know one tech stack & in depth → \* \* \* \* \*

- Every single Company has their own tech stack
- Google → own DB  
Goldensack → own version  
many more, java

10 billion msg/day  
 \* 500 bytes

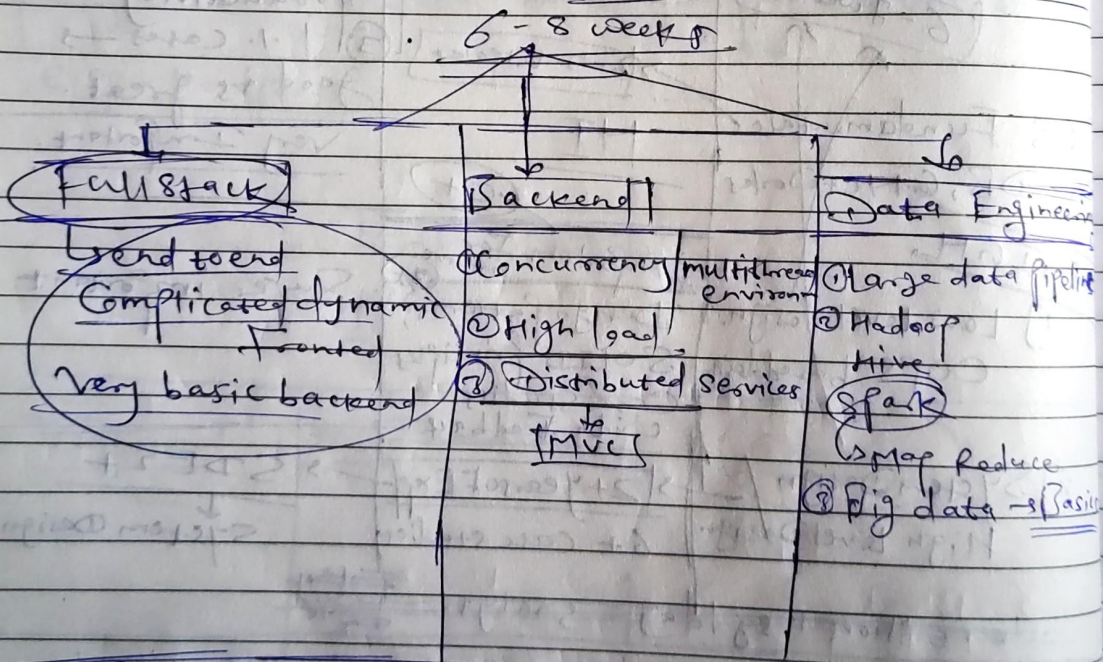

10 × 1000 × 1000 × 1000 × 500 bytes  
 ↓        ↓        ↓  
 GB      MB      KB

$$= 10 * 1 \text{ GB} * 500 = 5 \text{ TB}$$

5 new laptops  
 per day

Retrieving

Electives :-

- ① Advanced DSA
- ② Advanced HLD
- ③ Product Management for Software Engineering

## DSA

LinkedIn

1, 2, 3, 4, 5, 6, 7, 8, 9, 10

degree of separation (A, B)

Friends(A)

$\downarrow$   
[C, D, E]

Friends(Friends(A))

$\downarrow$   
[...]

2 billion users

$2 \times 10^9$  users/nodes

$2 \times 10^9 \times 1000$  edges  $\approx$  2 billion edges

$\{ i \rightarrow 1 \text{ to } 10^8 : \}$   $\leftarrow$  1 second  
cnt++

① A

② B

degree-of-sep  $\rightarrow 1, 2, 3, 4, 4+$

degree-of-separation

- ①
- 2
- 3
- 4
- 4+

friends(A)

~~if B in friends(A):~~  
~~return 1.~~

(Meet in the Middle Approach)

[...x...] [...x...]

else

~~if intersect(F(A), F(B)):~~

if intersect(F(A), F(B)):

return 2

else

if intersect(F(F(A)), F(B)):

return 3

F(F(A)), F(B)

[...y...] [...y...]

else

if intersect(F(F(A)), F(F(B)):

return 4

[F(F(A))]  
[F(F(B))]

else

1million 1million

return 4

intersect(list1, list2) → true  
false

① Binary Search  
② Hashmap, Hashset

for x in list1:

① Binary Search after sorting  
② Index, then search  
→ Hashmap  
→ Hashset

Approach

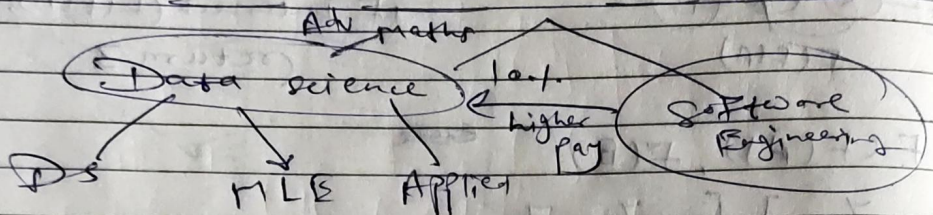

3 live classes a week

→ 7.5 hours a week

→ 7.5\* hours a practice

15 hours weekly time commitment

↓  
1 hr 2 hours everyday

← Data Science

← 100 engineers

- At least 8 design patterns.
